Model 5400 17-Inch Flat Panel Display

DataMetrics™ rugged displays combine environmental and mechanical engineering technology with computer technology to produce monitors for military and industrial applications. The Model 5400 Flat Panel Display is designed to meet and exceed the most stringent military specifications. The performance of these ruggedized monitors leave their commercial counterparts in the dust. Simply because they can perform every function that their commercial counterparts can perform, but DataMetrics™ rugged displays are able to withstand and operate in the harshest environments.
